PLAY-3004 -- Ledger batch overlap
Document key: PLAY-3004-batch-overlap-throughput.pdf | page 1 of 1

Severity: minor
Resolved: 2026-09-05
Affected systems: ledger-batch

Root cause: the nightly reconciliation kept the clock it was given before the daylight-saving change, so it started an hour into the online window and competed with live traffic for the same database.

Revenue at risk is shown on the chart below and is written nowhere in this note.
